

Installation Precautions

- 1. Professional Installation Recommended:** The company strongly recommends that installation be performed by a qualified electrician or installer. We shall not be held liable for any product damage, personal injury, or property damage resulting from unprofessional installation.
- 2. Load-Bearing Wall Requirement:** This product must be installed on a structurally sound, load-bearing wall capable of supporting its weight. The user is responsible for verifying the wall's structure and load-bearing capacity prior to installation. We are not responsible for damage caused by falling due to an unstable wall.
- 3. Avoid Concealed Hazards:** Before drilling, the user must identify and avoid concealed utilities such as electrical wiring, water pipes, or gas lines within the wall. The user or installer assumes full responsibility for any damage to hidden facilities and resulting consequences caused by drilling.
- 4. Use Correct Accessories:** Installation must be carried out using the dedicated mounting accessories provided with the product. The use of non-original parts or improper installation methods may cause the mirror to fall, for which the company shall not be liable.
- 5. Installation Environment Check:** Ensure the installation wall is flat, dry, and free of grease. When installed in damp environments (e.g., bathrooms), the electrical connections must comply with local safety codes and appropriate moisture-proof measures must be taken.

Usage Precautions

- 1. Cleaning and Maintenance:** Clean the mirror surface with a soft, damp cloth, optionally using a neutral cleaner. Do not use corrosive, abrasive, or strong acid/alkaline cleaners, as they may permanently damage the mirror coating and frame.
- 2. Avoid Mechanical Impact:** Do not impact or scratch the mirror surface or frame with hard or sharp objects. Although tempered glass is used, severe local impact may still cause breakage.
- 3. Electrical Safety Warning:** For products with electrical functions (e.g., lighting, demisting), users must not disassemble or modify the electrical components. In case of an electrical fault, stop use immediately and contact a qualified professional for inspection.
- 4. Keep Away from Heat Sources:** Never expose the mirror to open flames or close proximity to high-temperature heat sources (e.g., heaters, ovens) for extended periods, as uneven heating may cause glass breakage or frame deformation.
- 5. Child Safety Warning:** To prevent accidents, do not allow children to use the product as a toy or climbing object. Parents or guardians should inform children of the risks and provide adequate supervision.

Disclaimer: Installation and/or use of this product constitutes the user's full acceptance of these instructions. The company shall not be held legally liable for any direct or indirect losses arising from the failure to comply with the above precautions.
